

Graduate Major in Materials and Information Sciences Briefing Session

Materials and Information Sciences:
Interdisciplinary graduate major for doctoral students

If you are interested in this graduate major, please participate in the briefing session.

Target Audience: Students expected to advance to a doctoral program in AY 2027

* A briefing session for students planning to enter a doctoral program in or after AY 2028 is scheduled to be held sometime after the summer.

► Schedule

Wed., April 15th, 2026

To be live-streamed using Zoom

- ① 17:15~18:00 Explanation in Japanese
- ② 18:00~18:45 Explanation in English

Registration required.

► How to register

If you wish to participate in the briefing session,
please register from the website below.

Science Tokyo has established **the Graduate Major in Materials and Information Sciences, a new interdisciplinary program for doctoral students.** The new graduate major was launched in April 2025. Tokyo Tech, one of Science Tokyo's predecessor universities, established the Tokyo Tech Academy for Convergence of Materials and Informatics (TAC-MI) in April 2019 under the auspices of MEXT's WISE Program. The new Graduate Major in Materials and Information Sciences was launched after significant developments were implemented in TAC-MI.

The Materials and Information Sciences program empowers students to become **multitalented individuals** capable of promoting creative, interdisciplinary research in materials science and informatics. Through the program, we provide practical education with an eye on social services in collaboration with partners from industry, and enables students to connect information and materials by utilizing information sciences, multifaceted thinking, and broad perspectives.

Additionally, **we offer scholarships and Research Assistant (RA) salaries** that provide students enrolled in this graduate major with financial independence as they focus on their studies.

The eligibility screening will be conducted in the summer of 2026.

Students who wish to enroll in this major must undergo the screening prior to entering the doctoral program. Details will be explained at the briefing session.
