

Tokyo Tech Academy for Convergence of Materials and Informatics (TAC-MI)

Students are encouraged to come to one of the briefing sessions listed below.

In order to foster outstanding individuals, the Institute established the Tokyo Tech Academy for Convergence of Materials and Informatics (TAC-MI) in April 2019 under the auspices of MEXT's WISE Program, and will begin recruiting students starting in the fall. While in their graduate studies, students pursuing a doctoral degree can take this additional program, which will enable them to connect information with materials* by using information science and multifaceted thinking, as well as by taking a broad perspective. The program aims, in addition to the top-level research, to cultivate multi-talented human resources** to become leaders in this "space in multi-axes" that is our continually advancing society. Master's degree students of all Schools are welcome to register to join the Academy.

*In this context, "materials" refers to not only to material goods and chemical compounds but also to devices and processes.

**Those who can play a leading role in a transdisciplinary framework involving materials science, information science, and social services.

<Briefing Sessions>

1st : Wednesday, April 10

From 16:00-17:00 on Ookayama Campus

Main Conference Room, School of Computing (West Bldg. 8E, Floor 10)

2nd : Tuesday, May 14

From 16:00-17:00 on Suzukakedai Campus

Rm. G115 (G1 Bldg., Floor 1)

3rd : Monday, June 17

From 16:00-17:00 on Ookayama Campus

Main Conference Room, School of Computing (West Bldg. 8E, Floor 10)
